

SAFE SEAL WRAP

Polyethylene Shrink Wrap Tape

Engineered and **Made in Canada** with a unique formulation, this tape offers superior performance and reliability, making it the ideal choice for ensuring secure and watertight shrink wrap containments.

Designed specifically to perform in wet and challenging environments, our tape delivers strong, flexible adhesion for sealing seams, reinforcing joins, and patching tears. It's built to resist moisture, tearing, and environmental wear — providing long-lasting protection for your containment. Whether on-site during construction, in marine storage, or protecting industrial assets, this tape is trusted by professionals for its durability, versatility, and performance.

MATERIAL:	Virgin Polyethylene
THICKNESS:	9 mil (230 microns)
COLOR:	White
WIDTH:	48mm, 76mm, 96 mm (2", 3", 4")
LENGTH:	55 meters (180')
EDGE CUT:	Straight or Serrated

PRODUCT CODE	COLOUR	SIZE	ROLLS/CASE
SSD-TAPE-2	White	2" (48 mm)	24
SSD-TAPE-3	White	3" (76 mm)	16
SSD-TAPE-4	White	4" (96 mm)	12

Precautions:

Safe Seal Polyethylene Shrink Wrap Tape should be applied to clean, dry surfaces for best results. It's designed to seal and reinforce, not replace structural fixings. Avoid use near open flame or extreme heat, and always follow safety protocols when working in wet or exposed environments.

Applications:

Ideal for sealing seams, patching holes, and reinforcing vulnerable areas, this tape maintains a tight, watertight seal even in damp conditions. It's widely used across construction, marine, and industrial projects where reliable protection is key.
